## Police Withdrawal From Kimberley

Kimberley Town Council has already bricked up the door into front room of that building that the police used.

That means that access to that room would be from inside the building and that would mean changes to the plans that are on the borough planning web site for flats.

Looks like they have already decided the police are not coming back, and are doing work without planning permission or building control as that would take far longer than the interval since the police cleared out the room, and they said they did not know until then.

Looks like they decided the police are not coming back BEFORE the meeting they had on Friday evening about it.

Makes you wonder when they really did know.
